

# Mathematics, Robotics, 3D, Creative Writing, SAT, SCAT, GRE, GMAT, TOEFL AND IELTS

---

Premier Genie provides a platform for enthusiastic children to explore and hone their understanding in advanced mathematics, logical reasoning, computer science, problem solving and prepares them for standardized tests and international competitions.

## **SAT**

Do you want to ACE the new SAT? If you are determined to do so, plain hard work is not enough. Top level strategies, effective study methodology and clear understanding of concepts are vital.

This is exactly what our experts will take you through in our SAT course. Specifically designed for students who want to score super high scores on the SAT, our SAT program will introduce new concepts, unravel complicated ideas and equip the student with key information that is required to do well on this standardised test.

Over and above concepts, we stress on strategy. Hard working students can say, "I am studying, but my score is not improving. "This is only because there is a problem with THE WAY the student is studying. In our SAT course, we stress on learning from mistakes and implementing these learnings to new questions.

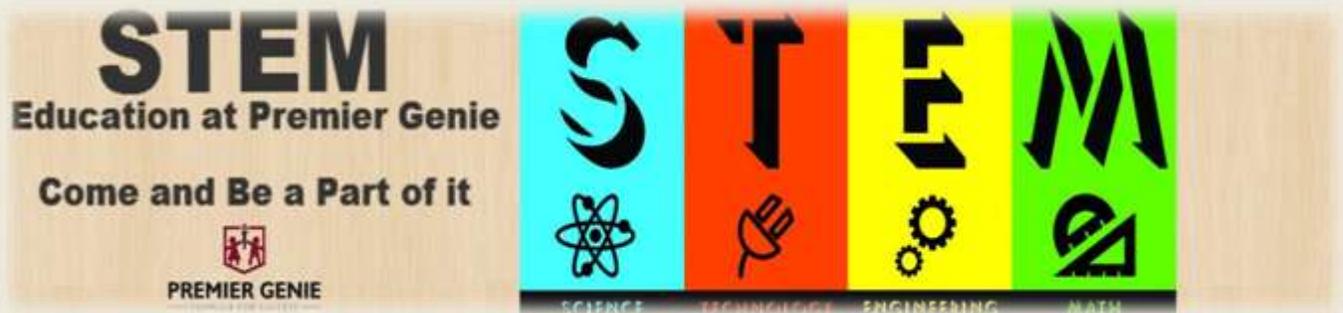

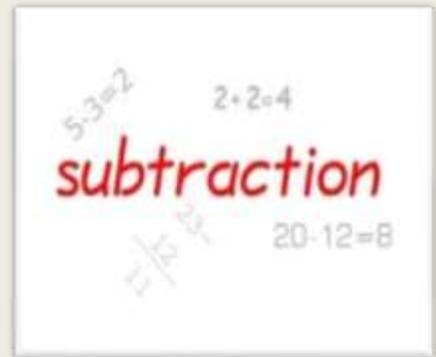

## Multiplication

In this program student will understanding multiplication which provide them important tools for solving real-life problems and builds a strong foundation for proportional reasoning. The goal of this program is to provide the children with a quick overview of multiplication and its facts so that they can learn instead of memorize.

## Subtraction

In this Program student will learn about Subtraction and its uses when it comes to real life time problems through various classrooms activities and different methods like place value box method and number strips methods. The main objective of this program is to make student comfortable in subtraction and understanding of the inverse relationship between the addition and subtraction.
